
The UOC was founded in 1995 as the world's first online university

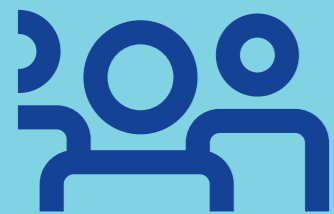

UOC Faculty of Health Sciences

Lifelong learning and impactful research in the field of health.

- A renowned, unique **online educational model**:
 - Adapting to and focusing on each student's needs
 - Centring on challenge-based learning
 - Providing constant support from teachers and tutors
 - Using innovative learning resources and tools
 - Fostering participation and shared knowledge building
- **Interdisciplinary research** in key areas such as nutrition, neuroscience, E-Health...
- The faculty has a global outlook and desire to make a social impact in line with the **UN Sustainable Development Goals** to promote quality education, health and well-being, nutrition, food safety and equity.

Team

11 full-time research professors

10 part-time adjunct professors

212 course instructors

22 tutors

14 PhD students

3 postdocs

5 administrative staff

Speech and Language Therapy

Bachelor's Degree in Speech and Language Therapy (UVic-UCC, UOC)

Nutrition, Food and Health

Master's Degree in Nutrition and Health

Master's Degree in Food for Physical Exercise and Sport

Postgraduate Diploma in Food Security Programme Management (FAO, UNESCO)

Postgraduate Diploma in Health Coaching

Postgraduate Diploma in Nutrition Applied to Physical Exercise and Sport

Neuropsychology and Neuroscience

Master's Degree in Neuropsychology

Master's Degree in General Health Psychology (UdG, UOC)

Specialization Certificate in Movement Disorders

E-Health

Master's Degree in E-Health

Master's Degree in Bioinformatics and Biostatistics

Postgraduate Diploma in Applied E-Health

Specialization Certificate in Health and Social Telecare

Medical Social Work

Master's Degree in Healthcare Social Work

Healthcare Administration and Management

Master's Degree in Clinical Management

Other healthcare management programmes

Clinical Programmes

Digestive Health

Pathology of the Digestive System

Endoscopic Ultrasonography

Global Health

Sexually Transmitted Diseases and HIV infection

Clinical Management of Skin Neglected Tropical Diseases (WHO)

Doctoral programmes

Doctoral programme in the Information and Knowledge Society

The Faculty of Health Sciences' research groups take part in this programme in the *Basic and Applied Health Sciences research line*.

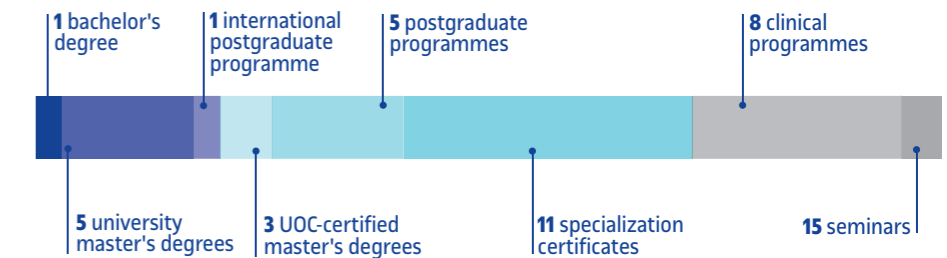

Joint doctoral programme in Bioinformatics

A programme that brings together the leading experts in the different areas of bioinformatics from six Catalan universities (UAB, UdG, UdL, UOC, UPC and UVic-UCC).

The Faculty of Health Sciences in figures*

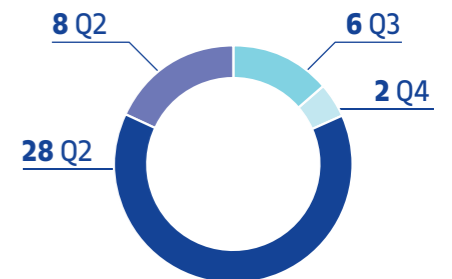

Programmes

48 programmes

Research

11 active research projects

46 publications in scientific journals
84% in Q1 or Q2

Students

+ 3.400

students from 34 countries

+ 2.100

graduates

Societal impact, alliances and dissemination

1.216 appearances in different media outlets

70 million people have benefited from the impact the Faculty of Health Sciences has made

13 scholarly and general interest events organized by the faculty

2 societal impact studies

+70 alliances and agreements with other centres and bodies
